

Local Authorities and Climate Change Adaptation:
Capacity Building and Best Practices

We are inviting you to the learning and networking
webinar

Strengthening Municipalities:
Why Localise SDGs and How? Reporting from
Norway-Nordic Countries
Second Part

Monday 11th November at 13.00 CET/14.00 EEST

REGISTER

Greek cities, similarly to European and other cities globally, are called to play a central role in advancing the great goal of climate adaptation and resilience to the 21st century challenges

The project 'Local Authorities and Climate Change Adaptation: Capacity Building and Best practices' implemented in the context of the EEA Grants Financial Mechanism Bilateral Fund 2014-2021 aims to promote bilateral actions between Norway and Greece by strengthening relations between Norwegian and Greek municipalities and increasing peer-knowledge for the implementation of climate transformation actions, necessary change-management reform processes in local administrations and the enhancement of environmental democracy at the subnational level

We are inviting you to join the second part of a special online seminar which aims to increase awareness on the state of SDG implementation through the Norwegian and Nordic countries example, discuss the Greek case and open-up a dialogue between Greek and Nordic municipalities.

SPEAKERS

**ANNE
ROMSAAS**

**BJØRN
RONGEVÆR**

**KONSTANTINA
KARYDI**

**AMALIA
VRACHNOU**

NAMES OF SPEAKERS

The networking and information sharing webinar is organised in the context of the EEA grants Bilateral Fund Program 2014-2021

The Climate Change Hub is a scalable multi-year initiative of three international institutions: Resilience Cities Catalyst (RCC), the Democracy & Culture Foundation (DCF), and Hellenic Foundation for European & Foreign Policy (ELIAMEP), to advance progress toward climate transformation and recovery goals in Greece and the broader region of southeast Europe through cross-sectoral collaborative action that elevates community voice. It operates as an independent non-for-profit entity.
